

ColorVu

FULL COLOR IN COMPLETE DARKNESS

Imagine capturing vivid, colorful details, in total darkness. Hikvision ColorVu delivers this and more.

ColorVu offers a wide array of benefits:

- Clear, full color images—day and night—with brilliant detail and clarity for more rapid identification of suspects.
- Improved safety for employees and customers walking in parking lots or other poorly lit areas at all times of day and night. It illuminates darkened walkways within cities, buildings, or on campuses.
- Around the clock, it reduces risk and enhances details when reviewing footage after an incident.
